

RESTORATIVE

Clinic Floor

- Dentist volunteers should arrive by 6:15 am or 12:00 pm and be ready to work by 6:45 am or 12:30 pm for shift 1 and 2 respectively.
- Dentists will need to find a chair quickly. If you did not bring an assistant, please go to the area marked Dental Assistants to find someone to work with.
- A brief training/orientation for the first ½ hour of each shift will be provided by the Lead.
- Please assure all equipment in your area is wiped down between patients and at the end of your shift. Please leave the disinfecting wipe on chair to show that a wipe down has been completed after your shift.
- Assure patient form is complete. Use only **BLUE** ink, see Lead. **Please print neatly and legibly.**
- Assure all sharps and any bio-hazard material are deposited into biohazard bags and containers. **Do not put other trash in biohazard bags.**
- Assure all instruments are taken to Sterilization in a covered container. Please make sure no sharps are sent to Sterilization.
- Wear appropriate personal protection equipment either provided by NM MOM or your own equipment such as safety glasses, face masks, gloves and disposable gowns, where appropriate.
- If you bring your own equipment, clearly mark the instruments with your name and take it to the personal instruments dirty location in Sterilization.
- **Dentists need to bring prescription pads.**

Patient treatment and cleaning of area should take approximately 45 minutes per patient. Please attempt to see 8 patients per shift.

Supplies

- General supplies will be placed on each table for 4 chairs to share. These supplies will be stocked throughout the event.
- A cardboard boat will be provided with the materials for each patient. These boats will be sitting in your department supply area.
- Other special items may be obtained in Central Supply or in your department supply area.

Instruments

- Instrument packs for each patient will be ready for pick up at Sterilization for Restorative.

Process

- Once you have treated the patient, raise the **red** card prior to cleaning your station for the Patient Escort to come and get your current patient. When you are ready for another patient, please raise the **green** card. If you have questions or need assistance, please raise the **yellow** card.
- In the cleaning process, please use the patient material boat to place all dirty instruments for return to Sterilization, in a closed container.
- Please have the assistant take all dirty instruments to Sterilization after each patient. Place all sharps in red bins. Sterilization will also come by to collect dirty items every 30 to 45 minutes.
- **Please make sure that you clean the HIVAC system per the instructions on the card by the table.**
 - **Do not allow patient to form a lip seal on the saliva ejector or HIVAC.**
 - **Before turning off HIVAC, remove it from the patient's mouth, point it at the ceiling, then turn it off.**
 - **After each patient, obtain pre-mixed line cleaner solution and pull one cup through the saliva ejector and one cup through the HIVAC.**
- The pre-mixed line cleaner solution can be found in 5 gallon containers throughout the clinic floor.

Restorative – Dental Protocol

If a restorative patient needs an extraction, a Restorative Lead is to be contacted to determine the plan of action. In turn, the Restorative Lead will contact the Oral Surgery Lead as necessary.

DYCAL and PULP CAPS (direct or indirect) are not a good service at NM MOM. NM MOM patients are not likely to afford the treatment to remedy a flare up should it occur after pulp capping.

If a restorative patient has a pulp exposure, the Restorative Lead should be contacted immediately, who in turn will contact the Endodontic Lead.

Place amalgam waste and amalgam capsules in the amalgam waste containers nearest your station. There will be an amalgam separator at the end of the HVAC system.

Crowns - Dental Protocol

Milled porcelain (Cerec) crowns will be performed on a very limited basis at the event. The number of crowns available at the event will be limited by chairs and equipment. Please have Endo and Restorative Dentists obtain a Crown treatment card for the patient **before** Endo and/or Restorative procedures are initiated requiring a Crown.

PLEASE BE FLEXIBLE and THANK YOU for participating today.
